## Invitation to the 9th FSS Security Talk

Dear Sir or Madam,

The study "Security in a connected world" (2019) by PwC Switzerland has shown that there is a tension between federalism and centralization. On the one hand, federal police structures favor community policing and police work adapted to the needs of society. On the other hand, there is a call for greater centralization of cyber and data competencies to address the ever-increasing cyber threats.

Against this background, there are key questions regarding the current situation as well as the future design of Switzerland's internal security:

- How do societal changes affect the work of security forces?
- What are the greatest threats to public and private security?
- What opportunities and risks do new technologies and data analyses bring for police work?
- How should competencies in the security field be organized between state and private actors and between the different levels of government?

At the 9th FSS Security Talk "Security Forces in a Modern State" on October 27, 2021 at the Hotel Bellevue Palace in Bern, experts from academia, the police and the private sector will discuss these and other questions.

We look forward to your participation and your registration by October 20, 2021 via our [registration form](#).

The event is free of charge for members of FORUM SICHERHEIT SCHWEIZ.

For non-members the contribution towards expenses is CHF 100. This contribution will be credited for new membership.

Yours sincerely

**Hans-Jürg Käser**  
President

**Fredy Müller**  
Managing Director
